ProModel Corporation Releases AST 6.8, a Custom Solution for US Army Forces Command

Simulation based software company provides custom predictive analytic solutions to US Army Forces Command for sourcing and synchronizing Army resources.

ProModel Corporation, a leading predictive analytic BI software and services company, today announced the release of AST 6.8 (AFORGEN Synchronization Toolset), a custom predictive analytic software platform used by US Army Forces Command (FORSCOM) to source and synchronize Army resources.

ProModel's AST is the authoritative system FORSCOM uses to conduct its unit planning and sourcing process in Army Force Generation (ARFORGEN). AST provides the Army with the means to view the predicted impact of today's sourcing decisions on tomorrow's utilization of Army personnel moving through ARFORGEN. AST "on screen" capabilities consolidates data from multiple sources, applies existing or "what if" business rules, predicts the outcome, and automatically depicts results thereby eliminating lengthy manual, linear, and presentation based methods previously employed. AST cuts development time for single Courses of Action from days to minutes, while enabling multiple Courses of Action within the same timeframe.

Some of the new features in AST 6.8 include: an expansion of online help across AST, the capability to support Unit Allocation and vetting of sourcing decisions for the Army National Guard and United States Army Reserve, modifications in report filtering options across AST to assist users with retrieving data from AST, and integration with ARTIMS (Army Training Information Management Systems) to provide visibility into exercise and training opportunities across the Army Reserve and National Guard.

ProModel serves the United States Federal Government and Department of Defense by providing innovative and adaptable custom and commercial-off-the-shelf (COTS) technologies and professional services that help synchronize operational needs, mitigate risk, and optimize resources.

"ProModel is proud of progress AST has made over the years. This remarkable toolset is now the go-to application at U.S. FORCES COMMAND. We are very excited to continue working with the Army and providing them with our innovative decision support technology." said Keith Vadas, President and CEO, ProModel Corporation.

About ProModel

ProModel is a leading provider of simulation-based, decision making tools and techniques for improving performance throughout the enterprise. A Microsoft Gold ISV Competency and Silver PPM Competency Partner, ProModel specializes in custom and COTS (Commercial Off the Shelf) products which integrate seamlessly with Microsoft platforms such as Project, Project Server, EPM, and Visio, to help organizations optimize portfolios, projects, processes and resource decisions that best align with business strategy.

Founded in 1988, ProModel is a privately held small business with over 500 active customers and 7,000 active users globally, including over 50% of the Fortune 500. Customers include companies in healthcare, manufacturing, logistics, business re-engineering, DoD, pharmaceuticals and financial services.
