

ProModel Corporation Supports US Naval Operations

ProModel Corporation, a leading prescriptive analytic BI software and services company, today announced that the company was awarded the first option year of a multi-year contract for the sustainment and support of the Naval Synchronization Toolset (NST) by Naval Air Systems Command. NST is an internet-based software application being used by Commander Naval Forces Atlantic to generate the Master Aviation Plan (MAP) and the Commander, Naval Air Forces FA-18 Class Desk to manage the FA-18 A-F inventory. Earlier in the year the Airframe Inventory Management Module (AIM) was granted full accreditation by the Commander, Naval Air Systems Command, VADM Dunaway and the MAP Module is currently nearing accreditation.

NST provides the Department of Navy with predictive analytic capabilities for the sourcing of individual aircraft, squadrons, carrier air wings, and carriers. NST offers rapid visibility into the consequences on readiness and resourcing based upon scheduling decisions. ProModel Corporation serves the United States Federal Government and Department of Defense by providing innovative and adaptable custom and commercial-off-the-shelf (COTS) technologies and professional services that help synchronize operational needs, mitigate risk, and optimize resources.

ProModel will be attending the annual Tailhook Reunion September 4th through 7th in Reno, Nevada. The Tailhook Association is an independent, fraternal, nonprofit organization internationally recognized as the premier supporter of the aircraft carrier and other sea-based aviation. The purposes of the Association are: to foster, encourage, develop, study, and support the aircraft carrier, sea-based aircraft, both fixed and rotary wing, and aircrews of the United States of America; and to educate and inform the public in the appropriate role of the aircraft carrier and carrier aviation in the nation's defense system.

Regular Tailhook Association membership is open to anyone who has made a carrier landing. Additionally, Associate Membership is open to anyone who has the desire to support U.S. Naval Carrier Aviation and the goals of the Tailhook Association.

"ProModel is proud of progress NST has made in the Navy. This remarkable internet based toolset is having a positive effect on Naval readiness. We are very excited to continue working with the Navy and providing them with our innovative decision support technology," said Keith Vadas, President and CEO, ProModel Corporation.

About ProModel

ProModel is a leading provider of technology enabled, predictive analytic decision support solutions. A Microsoft Gold ISV and Silver PPM Competencies Partner, ProModel specializes in custom and COTS (Commercial Off the Shelf) products to help organizations optimize portfolios, projects, processes and resource decisions that best align with business strategy.

Founded in 1988, ProModel is a privately held small business with over 500 active customers and 7,000 active users globally, including over 50% of the Fortune 500. Customers include companies in healthcare, manufacturing, logistics, business re-engineering, DoD, pharmaceuticals and financial services.
