

ProModel Corporation Exhibits Successful Patient Flow Optimization Case Study at Major Healthcare Conference

The Healthcare System Process Improvement Conference 2013 will feature Jim Montgomery of Carilion Clinic covering his work using a ProModel Solution.

ProModel Corporation, a leading provider of predictive analytic simulation software, today announced that Jim Montgomery, a Healthcare Executive and ProModel client, will be presenting a case study on patient flow optimization at the Society for Health System's (SHS) 2013 Healthcare Systems Process Improvement Conference in New Orleans, LA at The Sheraton New Orleans Hotel from March 1st through the 4th.

Montgomery, a retired Lieutenant Colonel, has held multiple C-Level positions within the Army Medical Department and is currently a Senior Performance Improvement Consultant within the Center for Innovation at Carilion Clinic in Roanoke, Va. Throughout his career Montgomery has built over 20 models to help maximize efficiencies in both inpatient and outpatient settings, and his most recent patient flow optimization work with a ProModel solution has led to a more valuable balance between admissions and capacity at Carilion. Montgomery is a Fellow in the American College of Healthcare Executives and also a Certified Six Sigma Black Belt through the American Society for Quality.

In addition to Montgomery's presentation at the SHS Conference, ProModel will also have an information kiosk set up for attendees to learn more about predictive analytic simulation within the Healthcare Industry.

The Healthcare System Process Improvement Conference will feature best practices in quality, productivity and efficiency for healthcare industry decision makers and providers seeking ways to lower costs and increase service. For the past 23 years, the Society for Health Systems has hosted this successful event drawing healthcare professionals, management and performance engineers, and health systems educators who are tasked with improving healthcare processes and facilities. <http://www.iienet.org/shs/conference/>

About ProModel

ProModel is a leading provider of simulation-based, decision making tools and techniques for improving performance throughout the enterprise. A Microsoft Gold ISV Competency and Silver PPM Competency Partner, ProModel specializes in custom and COTS (Commercial Off the Shelf) products which integrate seamlessly with Microsoft platforms such as Project, Project Server, EPM, and Visio, to help organizations optimize portfolios, projects, processes and resource decisions that best align with business strategy.
