

ProModel Corp. Awarded Multi-Year Contract From US Army Forces Command (FORSCOM)

OREM UTAH.--(BUSINESS WIRE)—Jan 27, 2006—ProModel Corporation a leading technology based, decision support company, announced today that it has been awarded a contract by the U.S. Army Forces Command to develop the Army Force Generation Synchronization Tool (AST).

“Current and future mission requirements are changing the demand on the Army structure and require FORSCOM to enhance the decision support capability associated with the Army Force Generation (ARFORGEN) process. The ability to predict and synchronize a myriad of events in rotational paths, training requirements, equipment and funding is essential to maintaining a sustainable, modular force structure. We are proud to be a part of the FORSCOM team,” said Keith Vadas, ProModel Chief Executive Officer.

ProModel has an established presence in the U.S. Federal government as a provider of leading simulation technology and associated technical services. Under the terms of the contract ProModel will provide technology and services to the Army over the next 5 years.

About ProModel

ProModel is a leading provider of technology enabled, predictive analytic decision support solutions.
