WHAT OUR CUSTOMERS ARE SAYING... AND PUBLISHING!

Running the simulation showed that we were nowhere near capacity...we didn’t really need to build three additional exam rooms.

Angela Roberts, VP, Facility Development & Management
AltaMed

The OR management team formed clinical based PI teams to steer the streamlining efforts and employed data driven simulation modeling to address the highly variable nature of the work with the goal of increasing patient throughput by 30% with no or little increase in costs. We used lean principles and simulation modeling to guide decision making as we streamlined the patient flow through the entire OR suite of our hospital.

David Fernandez, VP of Cancer Hospital & Neuroscience Institute
Robert Wood Johnson University Hospital

SOME OF OUR CLIENTS

CLIENT PUBLICATIONS BY APPLICATION AREA

- The Hospital Patient Flow Model: A Simulation Decision Support Tool; James B. Montgomery, Carilion Clinic
- Optimizing Efficiency and Operations at a Large California Safety-Net Endoscopy Center: A Modeling and Simulation Approach; Dr. Lukejohn W. Day MD, San Francisco General Hospital & Dr. David Belson PhD, et al., USC
- Reducing Postponements of Elective Pediatric Cardiac Procedures: Analysis and Implementation of a Discrete Event Simulation Model; Eugene Day et. al., Children’s Hospital of Philadelphia
- Simulated Staffing: Model Helps Transitional Care Nursing Home Deploy Workers Effectively. Gavin L. Collins, Presbyterian Homes and Services
- Comparison of a Hybrid Medication Distribution System to Simulated Decentralized Distribution Models; John P. Gray, Pharm.D., M.S., BCPS, et. al., University of Wisconsin Hospital and Clinics
