ProModel provides the integrated decision support system enabling Better Decisions - Faster

ProModel provides the capability for an organization to rapidly evolve into an intelligent enterprise through our integrated simulation decision-support system. The system is developed with each client organization to suit their unique needs now and in the future. A completed system delivers the vehicle and methodology for the intelligent enterprise to link performance metrics, corporate initiatives, resources, risks, and strategic objectives together resulting in improved enterprise performance.

VISUALIZE with simulation. In order to make informed decisions, you first need a thorough understanding of the current or proposed state. This includes understanding and visualizing processes and policies in action, while accounting for variability, constraints and interdependencies while maintaining focus on the Key Performance Parameters.

ANALYZE with simulation. This is the innovative brainstorming step while incorporating quantitative methods to identify and create scenarios that might improve the processes to meet the business objectives.

OPTIMIZE with simulation. With this powerful simulation scenario capability, you are now rapidly able to make decisions that will optimize your selected performance objectives with a high probability for success, today and into the future.

ProModel is a leading provider of Commercial Off-The-Shelf (COTS) simulation tools, customized applications, and consulting & training services to help you make Better Decisions-Faster. Our integrated enterprise modeling methodology enables you to Visualize, Analyze and Optimize all levels of your business. Whether you’re seeking to improve a process, an enterprise, or implementing Lean/Six Sigma, ProModel partners with you to provide innovative simulation solutions for your most complex performance challenges.
ProModel has partnered with the Government, DoD, and Defense Contractors to deliver high value solutions on many applications.

Secured 5 year contract from FORSCOM to Deliver Army Force Generation (ARFORGEN) Synchronization Tool (AST)

“ARFORGEN will synchronize people, equipment, training, resources and formations over time to satisfy the requirements regional combatant commanders will place on the Army.”

ARFORGEN Process: Requirements Driven, Capabilities Based

Responsible for any of these objectives?
- Readiness
- Transformation
- Global Force Provider
- Logistics
- Equipment Maintenance and Repair Management
- Experimentation, Integration & Requirements
- Homeland Security
- Lean and Six Sigma Implementations
- Sustainability
- Force Analysis
- Training Resources
- Budget Ramifications from Decisions

ProModel has received multiple awards for their work:
- Secured 5 year contract from FORSCOM to Deliver Army Force Generation Synchronization Tool (AST)
- CAA receives 2006 MORS Rist Prize for their study entitled Army Force Generation Model Simulation
- West Point has standardized on ProModel as the software of choice for training cadets in discrete event simulation modeling
